EDUCATION BACKGROUND

The University of Hong Kong (HKU)	2024.09-2025.11
♦ Major: Computer Science (Master of Science)	
Jinan University (JNU)	2020.09-2024.07
♦ Major: Computer Science and Technology (Bachelor of Engineering)	

SKILLS

- **Programming Languages:** Highly proficient in TypeScript, Python, and Go, enabling versatile development capabilities.
- **Backend:** Strong expertise in Node.js, Flask (Python), and Next.js (React.js) frameworks, with foundational knowledge of Fastapi.
- **Frontend:** Experienced in React.js development with basic understanding of React Native for mobile applications.
- **Version:** Comprehensive proficiency in Git and Gitlab for efficient code management and collaboration.
- **Database:** Working knowledge of MongoDB and PostgreSQL databases, with strong expertise in Prisma ORM.
- **Language:** English (Proficiency), Cantonese (Proficiency), Mandarin (Native).

WORKING EXPERIENCE

eBRAM International Online Dispute Resolution Centre Software Developer	2025.03-2025.05
♦ Developed a multi-language video conference platform with real-time translation using React.js and Tailwind CSS	
♦ Optimized participant status synchronization and responsive text display, enhancing code maintainability	
♦ Integrated OpenAI translation services for multi-language support in legal documents and contracts	

PROJECT EXPERIENCE

Mobile chat applications , Independent Developer	2025.02-2025.03
♦ Use React Native Expo to develop mobile pages and Tailwind CSS to design responsive UI.	
♦ Use Socket.IO to implement real-time messaging and online status management.	
♦ Optimize static resource loading and lazy loading of images to improve page performance indicators.	
♦ Use Flask to build RESTful API, Expo Clerk to handle user authentication, and PostgreSQL to implement message persistence.	
Personal Website , Independent Developer	2025.02-2025.03
♦ Develop a responsive personal blog based on Next.js.	
♦ Implement a custom theme system and MDX article parsing system.	
♦ Optimize static resource loading and lazy loading of images to improve page performance indicators.	
♦ Configure Git workflow and GitHub Actions to achieve automated deployment.	

HONORABLE EXPERIENCE

Ernst & Young (EY) Hackathon Competition (Winner in Final Round, Rank 15/364)	2022.10
Outstanding Student Award at Jinan University	2023.10
Outstanding Student Award at Jinan University	2022.10
Outstanding Student Award at Jinan University	2021.10
